1. **Project Name** : Online Internet Banking (E-Banking)

   Technology Used : ASP.NET, HTML, Javascript, MS Sql
   Project Description :

   This project investigates the entry threshold for providing a new transaction service channel via the real options approach,where the entry threshold is established by using an internet banking system designed for the use of normal user(indivisuals),Industrials,Enterpreanurs,Educational Institutions.Coustomer must have a valid userid and password to login to the system if a wrong password is given trice in succession,that account will be blocked and the coustomer will not able to use it.When an invalid password is entered a warning is given to the user that his account is going to be locked. After the valid user logs in he is sowing the list of accounts he has with the bank. On selecting the desired account he is taken to a page which shows the present balance in that particular account number. User can request for the details of the last 'n' number of transactions that he has performed.User can make fund transfer to another bank account in the same bank.

2. **Project Name** : Online Student Faculty Feedback System
