Projects

PREDICTING BIRTH CONTROL FOR HUMANS	AUGUST 2017 - MAY 2018 A multinomial logistic regression analysis was performed to predict the birth control for humans using behaviour from selected predictors from wife age and wife education level.The specific target to find contraceptive method used during pregnancy of lady. Nine predictor variables included in the model were: wife age, wife education , wife religion, wife working condition, husband education, husband occupation, number of children born, standard of living index and media presentation.
DYNAMIC ENCRYPTION ALGORITHM FOR RTA	JULY 2012 - MARCH 2013 Most of the available encryption/decryption techniques are not perfect for RTA over the Internet since they were originally built for text data, and due to their extensive computations which result in an unacceptable delay and processing time. In addition, it provides high level of security by choosing a key length of 1024-bit long, another interesting property of the algorithm is the ability of using a new different key for each packet.

Work Experience

AUGUST 2017-MAY 2018	BUSINESS ASSOCIATE at TATA CONSULTANCY SERVICES, Hyderabad I did an internship at Tata Consultancy Services, Hyderabad, for a period of ten months under the guidance of Mr.Manoj Gupta.
